

PARTNERSHIP LOCK-UP GUIDANCE

April 2026

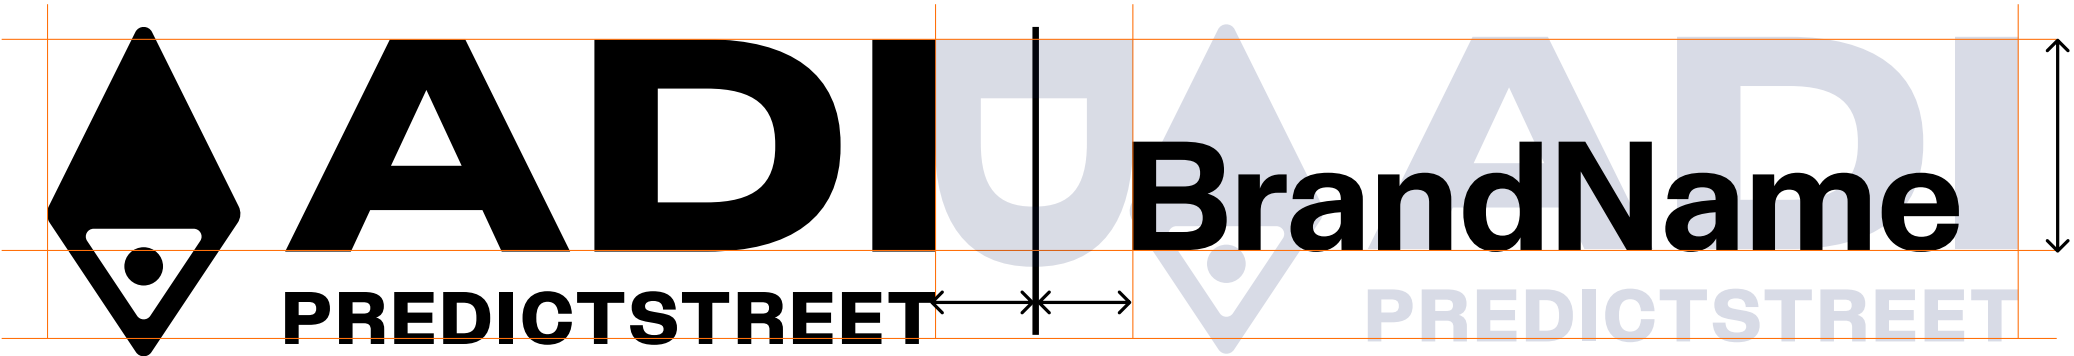

Partnership Best Practice

Strong partnerships rely on clear and consistent co-branding.
Use the following examples as a guide to best practice across all applications.

Stacked Logo Co-brand placement guide

- 1. ADI Predictstreet logo always appears on the left hand side of the lock-up.
- 2. Always use the solid black or solid white version of the ADI Predictstreet Logo for co-brands.
- 3. In the stacked lock-up the co-brand should sit on the same baseline as ADI.
- 4. In the horizontal lock-up the co-brand should be centred to the ADI Predictstreet logo.

Horizontal Logo Co-brand placement guide

Partnership Lock-up

When co-branding with third-party vendors, use a horizontal lockup with a single dividing rule, as shown. Ensure both logos are visually aligned and evenly spaced from the divider. When scaling, the partner logo should be equal to or smaller than the ADI Predictstreet logo.

Partnership Lock-up

To ensure consistency and visibility, partnership lock-ups have to be applied correctly. Below are some examples of what to avoid when working with a partnership logo lock-up.

 Do not use color logos other than black or white

 Do not rotate the lock-up

 Do not exceed the height of the ADI Predictreet logo

 Do not apply a drop shadow or similar effects

 Do not remove the divider line

 Do not stretch or otherwise distort the lock-up

 Do not remove or move elements from the ADI Predictstreet logo
